

Design of National ICT Programmes in the Context of ERA Coordination

Objectives of the workshop

- Stocktaking on design aspects of national programs open for transnational collaboration, from the motivation, to the barriers of planning, implementation and evaluation.
- Exchange views in these diverse field, give the floor for different players, from research, administration and real life, including the financial institutions,
- Draw up potential areas of transnational collaborations, ETP-s, national TPs, EU-wide initiatives,
- The host country is an emerging growing economy with changing, but sometimes rigid structures, with experiences in project collaboration. The program-level trans-national collaboration can bring in some added value.
